

LEARNQUIX

A scientifically designed methodology and well crafted content has been built to help students learn faster and score better while teachers and guardians unravel the benefits of technology in improving education.

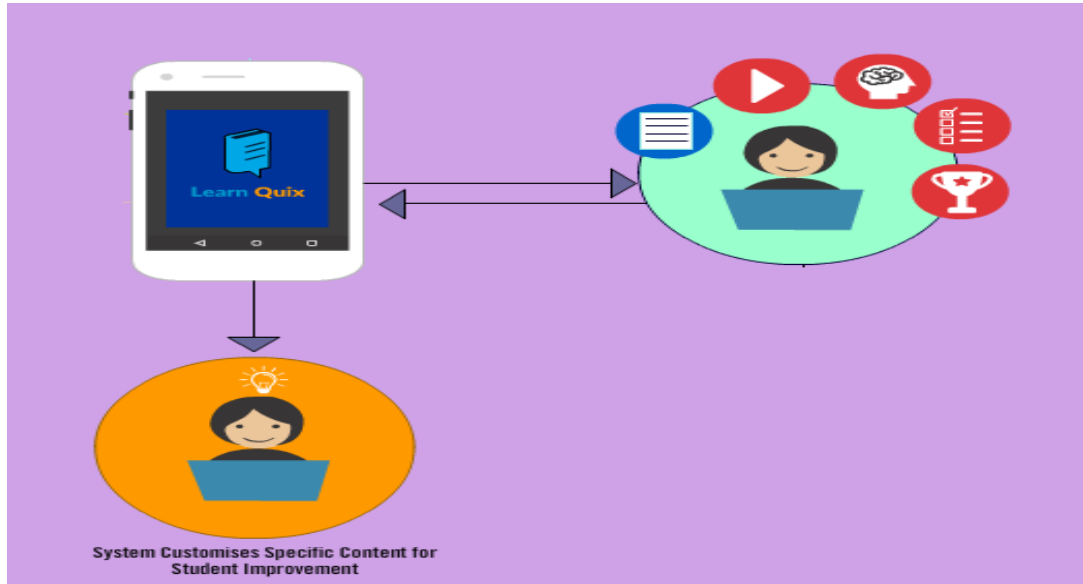

Traditional methods of learning have some **demerits**:

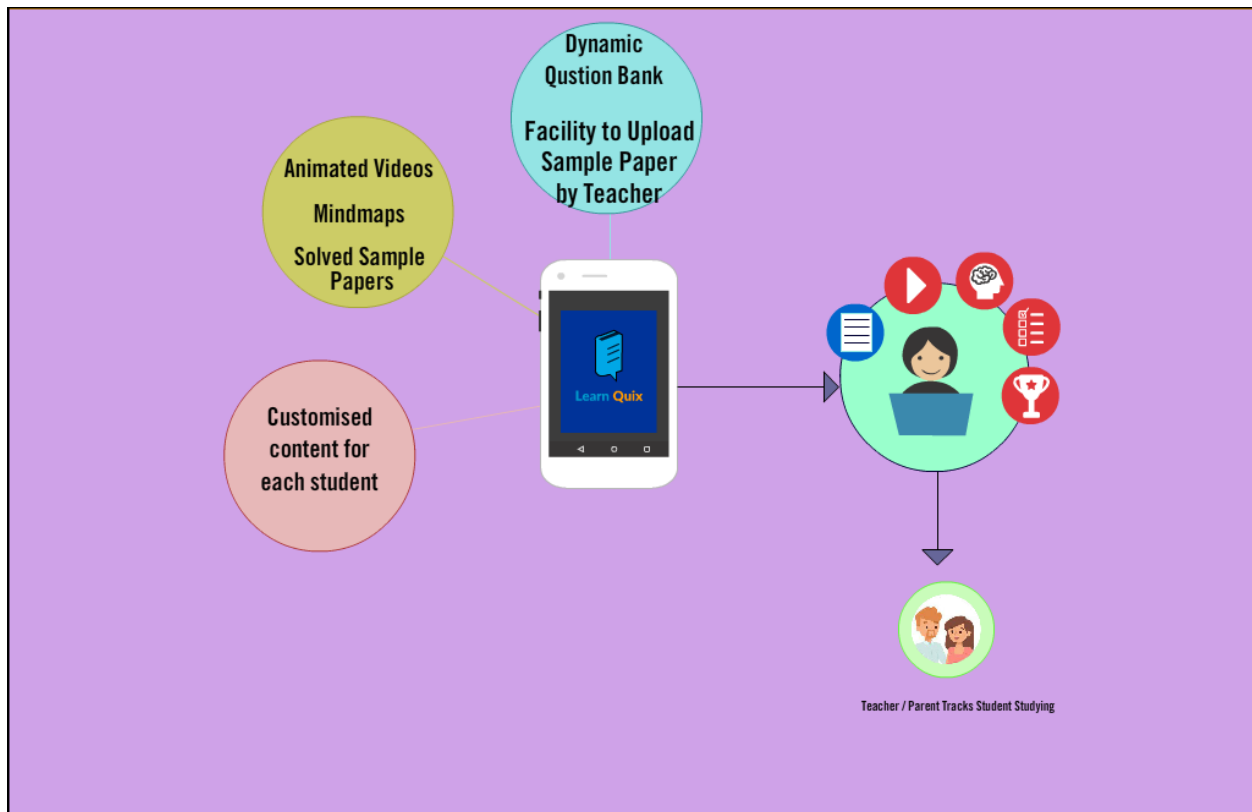

1. Features :

- **Customization** - Software creates customized products for each student based on results. Also, extra Contents can be added as per feedback of your School/ Institute.

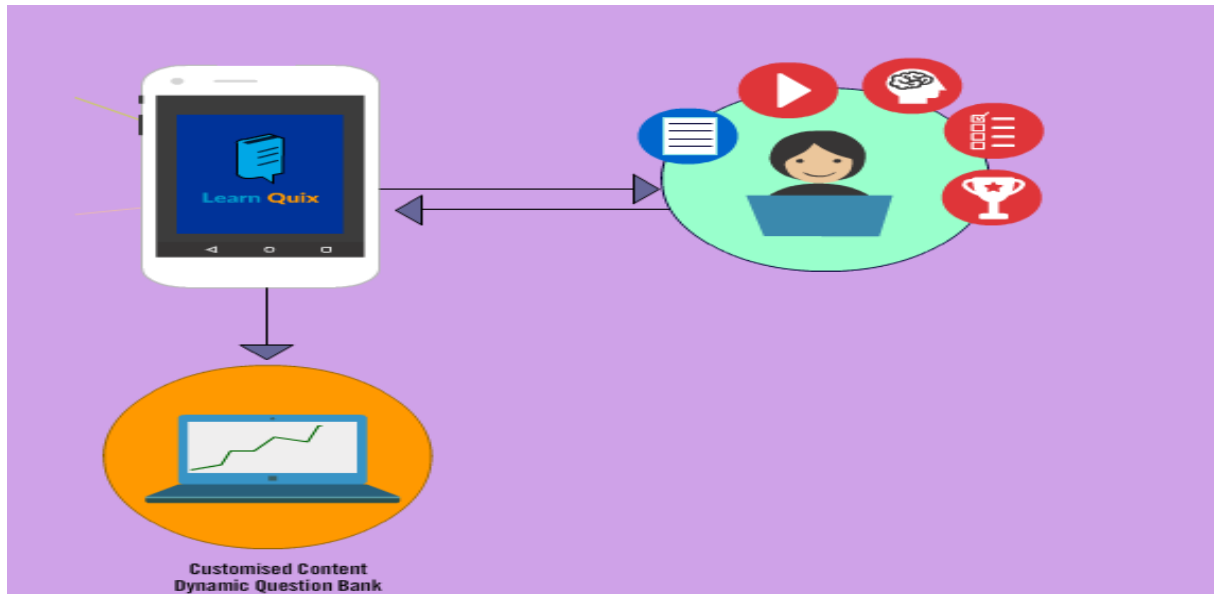

- **Adaptive learning** - Dynamic software measures improvement area of students through special designed questions in different difficulty levels and provides inputs to improve upon specific areas of students. Students can learn same course in half the time

- **Tracking Study** – **Teachers/Parents** at your institute can see study time- chapter wise in real time and track development of students.

- **Attention Building** –Contents are delivered as animation, video, mind map etc; accessible through mobile, computers/tablets–website and **Android App**

- **Technology enabled learning** - Learning made simple and FAST by using Technology, good content and crisp summary;

2. Our Proposal:

- **Concessional Fees**– Currently at discount at Rs.3000/ per student per year with Maths and Science.
- **Reciprocate with your valuable inputs** – We have a team of high quality teachers at our offices at Kolkata and Mumbai. We will add questions, sample papers etc based on your feedback after every month subject to mutual consent.
- **Hall of Fame**- We recognize and reward students who not only score high **but also show improvement**. We shall publish their profile in our website in ‘Hall of Fame’ with consent of student, teacher and parents.

- **Scholarship Program** - We conduct various scholarship programs for students through our ‘Gyantarang Scholarship Program’ and provide scholarship to deserving candidates and economically backward students if required. We are supported by leading Corporates
